**Subject:** Redistricting  
**Attachments:** osaa.xls

I would like to take the opportunity to express myself to the committee about the redistricting of the OSAA. I have tweaked slightly the Cowapa League/ Tim Sam 5 classification for these two looked in my opinion to be some of the better ones I have looked at.

I would like to only say that there seems to be too many playoff teams per league. I would like to further purpose introducing into the conferences districts. Districts can be from 3 to 5 teams (normally 4). To make the playoffs a team must win their district or their conference. If a teams wins both their conference and their district the next place conference team goes. With 6 conferences that would have a total of 18 teams making the playoffs. The district can be made geographical or population wise for my example I used student population, I have only lived in the state 5 years and do not know where all the different locations are.

The last 2 to 4 games of the year are the district games, and the importance of these games are heightened. I have lived in different areas of the country and have seen this type of system work elsewhere and believe it would work good for this location.

Thank you for your time and consideration.
