John Here is my final draft including the 1A schools.

Pink = Private playing football.

Gray = Private or Public not playing football.

This is Using a multiplier for Private schools of 1.6

*** Want to "Play Up"

Green is Biggest School in Classification Red is Smallest.

Bold Black # at top of Classification is # of schools at that level, black not bold is # playing football.

6A & 5A both have one league I would combine into a Super League with a North/South split within it. (helps with scheduling)

Blue outlined teams in 1A combine for football.

This is another idea you may throw out there.

Take Biggest 48 schools and they are 6A next 48 5A etc until all are done.

It actually even comes out with 48 at every level. Numbers would be pretty comparable to what my other one has.

Also is a multiplier system for Private of 1.45

Teams that want to play up would move the smallest schools in a classification down to the next classification
